

Dr. Luz Mejia, Dr. Denise Assogna  
and Dr. Joseph Blondin

Saving your natural teeth is the main goal at Assogna Endodontics. Their expert team is devoted to preserving a patient's natural teeth through advanced root canal treatment. Endodontic specialists Dr. Denise Assogna, Dr. Luz Mejia, and Dr. Joseph Blondin utilize the latest techniques and technologies to save teeth that otherwise would be extracted. Using surgical operating microscopes they can see inside the tooth during procedures and correct or detect many problems that could otherwise lead to tooth loss.

Patient comfort is also important at Assogna's spa-like facility that provides music, hand treatments, and compassionate pain-free dentistry. The Assogna Endodontic team provides superior patient care focusing on each patient's unique situation, comfort, and needs.

We would like to welcome Dr. Joseph Blondin to the practice. He is a graduate of Notre Dame, The University of Connecticut Dental School, and Endodontic Residency Masters Program. He is currently in the process of becoming board certified. His high standards, genuine compassion, and caring make him a great addition to the team.
